

Evolving Bioscience Imaging

Biennial AIMBI Conference 2011 Coolangatta, Australia

Call for Papers

Evolving Bio-Science Imaging Conference – 2011

Please consider delivering an Academic Paper at this very friendly conference.

There are formats to suit all presenting styles. Consider a ten minute favourite “tips and tricks” or a full 20 minute, thirty minute or 40 minute paper.

Presentations are by invitation. We encourage you to submit a title and abstract of between 150-250 words for consideration by the Program Committee.

We will also ask all delegates to put together a 5-10 min powerpoint presentation on their work and their department. This will run during breaks and replace a poster presentation.

Please contact Madeleine Kersting to submit your abstract for consideration.
